

**Marigolds**

PETITE ORANGE, PETITE GOLD and PETITE HARMONY are All-America winners of bronze medals for 1958 in a new class of extra dwarf double French Marigolds. Included with these three winners should be PETITE YELLOW, which is of the same type but was not ready at the time the others were entered. The Petite strain is distinctly different from any other class of Marigold, being especially bred to remain dwarf under conditions where most Marigolds tend to grow rangy and wild, with late flowering tendencies. The Petite strain produces an abundance of very early blooms with a long blooming period. Plant habit is compact, 6 inches tall and 10 inches wide, with flowers borne in great profusion. Over 50 blooms per plant in full flower at one time, have frequently been counted. Makes an ideal edging plant, in either of the four strains, because flowers cover the plants until no foliage is visible. Color of three strains is indicated by name, while the Petite Harmony flower is a beautiful contrasting bicolor. Guard petals are a rich, deep mahogany with a solid gold crested center.

Each of the above, Pkt. 25c; 4, \$1.00.

# The 1958 All-America Winners

MAYTIME, an All-America Selections winner for 1958, is an F<sub>1</sub> hybrid grandiflora in an enchanting shade of clear, light salmon pink with slightly deeper veining. The flowers are large, 3½" to 4", of good substance with just a slight fringer, freely produced on vigorous, compact, spreading plants with an average height of 12 inches and spread of 24 to 28 inches. Maytime is free flowering with the ideal habit for pots and bedding. This soft shade of light salmon pink brings an exquisite new color to this most popular class of petunia, which will combine well in any garden setting and add a fresh touch of beauty throughout the summer. ## New Tetra Ageratum

**BLUE MINK** 10 in. A true "tetra" with unusually large flowers, borne on stiff stems that hold them well above the foliage. Grown from seed, the plants are uniform and compact, comparing favorably with the varieties Riverside and Cardinal Mundelein which are propagated from cuttings.

While the stems rise well above the foliage, they are not conspicuous, still are long enough to permit cutting for use in low bowls and flower arrangements. Pkt., 35c 1/16 oz. \$1.50

**BLUE MINK Ageratum** makes a delightful bedding and edging subject with **Petite Dwarf French Marigold**

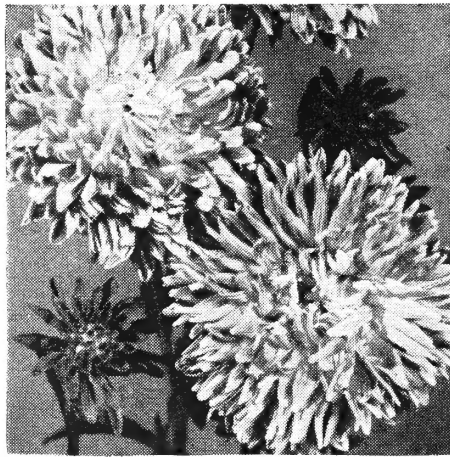

### How to Cultivate

#### Chrysanthemums From Seed

If you have a hothouse or frame you may sow the seed anytime, excepting hot summer months. The seeds can be sown as soon as frost is over, but not much later if you wish to see good flowers the same year. Sow the seed in pots or flats or in protected frame. Since the seeds are small care must be exercised not to wash them away. In about two or three weeks the seeds will germinate. When they are large enough to be transplanted, the seedlings should be planted in trays or outdoor and they will come to bloom the same year

### Early Flowering Double Mixed

Starts flowering already in August, mostly full double, some are semi-double and a few singles in dozens of different colors. Flowers from seed the first year often comes 3 inches across, second year from cuttings often exceeds 4 in 50 seeds \$3.00; 25 seeds \$2.00

## Orchid Beauty Aster

This new aster is an entirely new color, never before seen in any type of aster. Described as a unique rosy-orchid, the flower form is of the American Beauty type with globular, fully double flowers with gracefully incurved petals. Plants are well branched and flowers are noted for unusually long cutting stems Pkt. 40c;

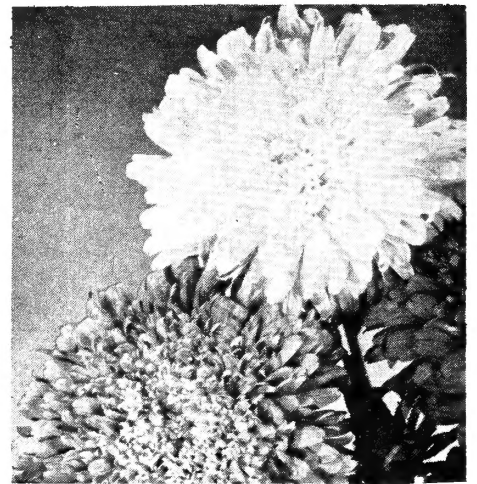

**Fairy Mixed Dwarf Candytuft.** Dome-like plants are compact, 8 inches high (half the usual height), uniform, neat. Colors: pink, rose, carmine, crimson, lavender, flesh pink and white. A good subject for bedding or border. Pkt. 25c

**Centaurea Cyanus.** Extra Early Mixed. Will bloom 20-25 days ahead of regular strains. Plants are slightly more dwarf and more compact than the usual centaurea. Mixture includes pink, light blue, red, mauve. Pkt. 25c

**Fall Festival Dahlia.** Easy from seed, ideal as a bedding plant. Taller than Unwin type, long stems for cutting. Flowers double, semi-double, small proportion of singles, colors reminiscent of the Northern woods in fall. Pkt. 25c

**Orchid Flowering (Starfish).** Grace and charm characterize the orchid dahlias in beds or in vases. Pinched out they make fine, compact, free branching bushes. Cut before pollen shows, flowers keep for days. Pkt. 50c

**Mission Giant Aster, Mixed.** Flowers of 5-inch size, with tight, quilled pin-cushion centers. Exceptionally long lasting cut flower. Blooms profusely, medium early, well suited to the home garden.

Pkt. 25c

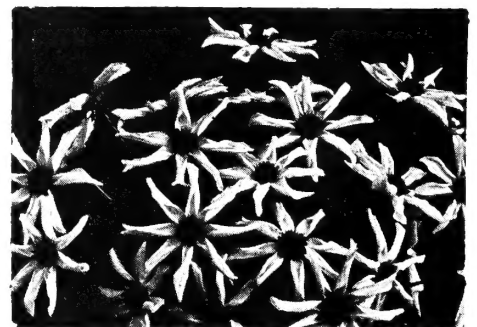

**Empress Aster, Mixed.** Sturdy, branching, informal variety developed primarily for the home gardener. Five and six inch show type blooms, 100% double in balanced mixture of all aster colors

Pkt. 25c

## Mandarin

**Cosmos** A brilliant orange cosmos with flowers frequently having forty or more petals, a real innovation in this class. Even more impressive are the plants. The heavy, dense cover of foliage makes it superior to any other variety. This pleasing foliage is maintained all through the season, even after plants have been in bloom a long time. Instead of the usual sparse open growth of cosmos, MANDARIN makes a luxuriant garden specimen. Pkt. 25c

**FLOWERING KALE.** 18 in. Although belonging to the Cabbage or Kale family, this Flowering Kale is entirely different as to its appearance. In young stage its leaves are green just like ordinary Kale, but in autumn as the season advances remarkably beautiful colors begin to appear. The colors range from white, cream, pink, rose, magenta, etc., on dark green ground. As the plants grow, the colors become more brilliant. We suggest seed be sown in July for colorful plants in early September through October until killed by heavy frosts. Seeds germinate in 10 days. Pkt., 25c.

**Masquerade F<sub>2</sub> Pansy.** Striped, shaded, flat blooms of huge size. Vigorous, yet compact, not often over 6 inches high. Earlier than Swiss types. Jumbo blooms of rust, yellow, blue, violet, pinkish mauve, lavender. Pkts. 50c

**GLITTERS** ALL-AMERICA SELECTIONS

Glitters petunia is an F<sub>1</sub> hybrid, the first real red and white bicolored introduction. It grows only 8 inches high, is nana compacta type, and an excellent and very showy dwarf bedder and edger. Glitters seems much more uniform in its starred or striped red and white coloring than the blue and white bicolors and this is a rich Fire Chief red with contrasting white stripes. Besides being the first and only one of its coloring, the condensed habit of growth keeps it neat and striking at all stages and seasons. Blooms are about 2 inches across Pkt. 50c., 3 pkts. \$1.25

**Pink Satin**

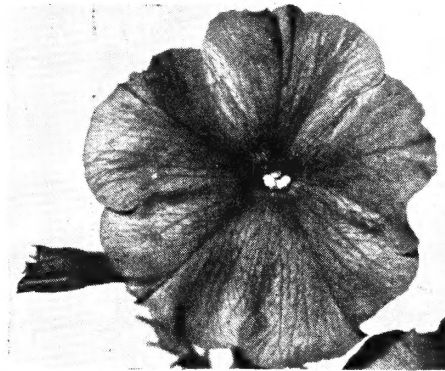

PINK SATIN, F<sub>1</sub> hybrid multiflora, plant is globe shaped, dwarf and persistently compact. Flowers are a brilliant rose-pink, accentuated by a small white area deep in the throat of the bloom. Their color is every bit as dazzling as Red Satin, and part of that dazzling effect is due to the solid mass of blooms that cover the plants. You can scarcely see the foliage at all when bloom has reached its peak, and plants maintain that display week after week without splitting open. Pkt. 50c.

## petunias

**RED SATIN** ALL-AMERICA SELECTIONS

Red Satin petunia is an F<sub>1</sub> hybrid multiflora of the richest red yet produced in petunias. It is that most desirable orange-red shade, richer and more brilliant in all kinds of weather, in sun or shady locations, than the outstanding previous winner, Comanche. Just to suggest that this newcomer is more floriferous, on a more compact mound-shaped plant a foot across and less than a foot tall, than the outstanding Comanche Pkt. 50c., 3 pkts. \$1.25

**Single Bedding**

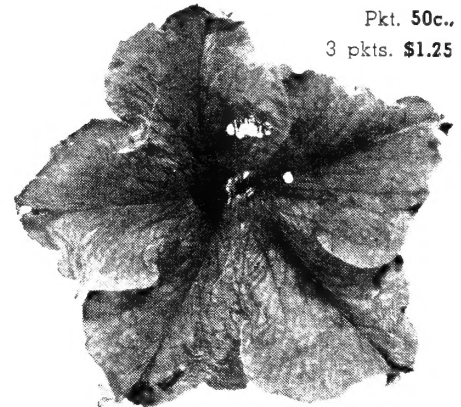

Uniformly compact growth and fair size flowers, 2 to 3 in., best suited to bedding; 12 in. tall.

**Admiral.** Perhaps the finest blue Petunia, very uniform and true clear blue; ruffled. Pkt. 25c  
**Dwarf Mixed.** Pkts. 15c & 25c; 1/4 oz. 75c

SKY CHIEF is of the Nana Compacta type, an open pollinated variety, product of a cross between Snowball Improved and Silver Blue. It carries the compact habit of Snowball, with large flowers of clear pale blue. The color stands up well under warm growing conditions. Should provide a welcome addition to the range of Nana Compacta Petunias. Pkt. 25c ➔

**Ballet.** Petunia Ballet is a blended mixture of the F<sub>1</sub> Hybrid Grandiflora Petunia Ballerina, Bolero Improved, La Paloma, Tango, Fire Dance and Crusader. In addition to these named varieties a deep purple and a steel blue are blended to make the color range

**BLUE LUSTRE**

While the Satins are Multifloras, Blue Lustre is the first of a new Grandiflora series. This hybrid has large, slightly waved flowers of a deep mid-blue. It comes into bloom the earliest of the Grandifloras and continues without interruption to the very end of the season. Plants are low, dense and spreading. Pkt. 50c., 3 pkts. \$1.25

# What's new and different

## Petunias

Every gardener grows petunias and why not. They're easy to grow, bloom until frost; brilliant colors, waved petals, fringed petals, double flowers. Alike suitable to beds, borders, boxes, pots; cutflower. For early start, sow seeds in well levelled soil flats, don't cover seed; to water use a mist spray. Transplant at least once before setting out. In the doubles, select the weakest seedlings, as they are the doubles.

### F<sub>1</sub>'S ARE ECONOMICAL AND EASY TO GROW

F<sub>1</sub> hybrids grow stronger and faster, are easier to grow. Fewer plants are required because of extra vigor. Allow plenty of room. Plants spaced 24 by 24 inches will give complete coverage by mid-July. Proper spacing prevents extra tall growth and falling over.

### NEW MULTIFLORA F<sub>1</sub> HYBRIDS

## Wee Willie Sweet William

A delightfully different strain of annual sweet William. Plants are ultra-dwarf and compact in habit. The single flowers are about ¾ inch in diameter, are selfed, zoned and edged in gay combinations of crimson, ruby, deep rose-pink and white. Flowers are produced at a very early stage of growth when the plant is about 2 inches high. This is one of the few edging plants available in red and pink.

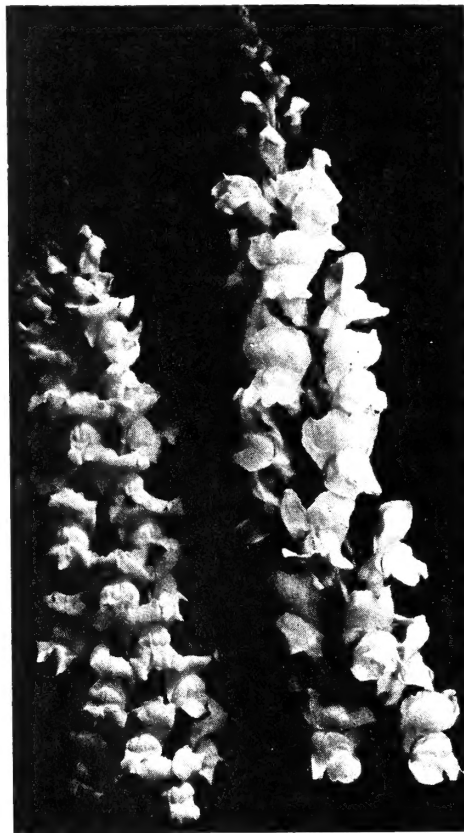

Pkt. 25c

## Pride of Dieldrin Zinnia

A new color combination in the giant cactus-flowered zinnia class. Flowers are bicolored with golden orange on the outer portion, deepening to the most vivid scarlet flame imaginable in the centers. Plants have unusual strength and vigor and bear flowers 4 to 5 inches across with petals twisted and pointed.

## ZOYSIA JAPONICA (Japanese Lawn Grass)

CROWDS OUT CRABGRASS

Zoysia japonica, commonly known as Japanese Lawn Grass, was first introduced into the United States about 35 years ago from Korea where the climate approximates that of New York State.

Zoysia japonica is a low growing, sod forming perennial which if not mowed, will grow to a height of about 9 inches. It has a broad, somewhat course leaf similar to Red Top, but does not grow as tall.

Zoysia japonica is the only variety of Zoysia which is hardy and will grow in the South as well as in the North. It should never be confused with Zoysia matrella which is of value only to the southern end of Florida where it is sold as sod under the name of Flawn.

It is generally believed that Zoysia japonica will be of great value for the following reasons:

- (1) Its ability to withstand heat, long periods of drought and extremely cold climates.
- (2) Its ability to crowd out Crabgrass as it is most dominant during the Crabgrass season.
- (3) Its ability to provide a green cover during the summer months when other grasses, such as Kentucky Blue, turn brown and ragged. It will also hold its color into the late fall longer than others.
- (4) Its ability to withstand heavy traffic and its extraordinary healing qualities.
- (5) The fact that it is disease free and weed free. So far none of the known pests have attacked it. It is immune to Chinch Bugs.

A client in Ft. Morgan, Colorado writes:  
"I ordered 1 lb. Zoysia Japonica last Spring and sowed it. Because apparent growth was so slow in developing the gardener reseeded with common lawn mixture which soon covered the barren patches. Despite this, however, those areas which had the Japonica are today a good healthy sort of sod easily discernible in the overall lawn. I will need 25 lbs. more of Japonica seed for reseeding."

NEW YORK 36, N. Y.

November 30, 1953

Seedsman, Inc.,  
13 Warren St.,  
New York 7, N. Y.

Gentlemen,

You asked to let you know when our Zoysia lawn would to turn brown

Now, the end of November, it is still a perfect green. Our Zoysia lawns are the admiration of everyone - they could not be more perfect, and the \$500 I invested in zoysia seed last Spring is far cheaper than spending \$500 for the usual hundred pounds of ordinary lawn seed and several hundred bags of fertilizer, and the labor of applying it all, every Fall, not to mention the daily Summer sprinkling of the lawns- something not needed for the Zoysia.

This much I will say-- it just is not practical to sow Zoysia seed alone to start a lawn. I would say the best plan for a new lawn is to sow it in the Fall, rather thinly, using mediocre grade of ordinary seed; let that come up-- you will have a fair quality lawn next Spring. Then that May, as soon as the ground is getting warm, go in and sow the Zoysia at the rate of 30 lbs. per acre, and rake it in, to get it down to the ground, and by August you will see it take a good hold- and by the Fall it will have driven out all the ordinary grass seed, and you will have a perfect Zoysia lawn.

Very truly yours

## GRASS SEED: DON'T BUY IT BLIND

### GRASSES' SOIL LIKES AREN'T ALL ALIKE

For instance Blue grasses require rich, moist, clayey loam; drouth tolerant Fescues, illahee & chewing, are adaptable to dry, sandy soils.

### ARE YOU USING THE RIGHT FORMULA FOR YOUR SOILS?

Want to discuss it?  
Phone BARCLAY 7-1966

### BENT GRASSES (Agrostis)

**ASTORIA BENT** (Capillaris). An underground creeping sort, usually by rhizomes; gives a dense, reinforced sod of attractive green color

**HIGHLAND BENT** (Agrostis Tenuis Hyland). Slightly coarser than Colonial, more rugged—withstands adverse conditions of climate and low fertility

**SEASIDE BENT** (Maritima). Spreads by surface runners or stolens; requires constant mowing and top dressing with fertilizer;

**VELVET BENT** (Canina). The best of the bents. Price on application.

**RED TOP**. Fancy Re-Cleaned (Alba). Quick growing grass of 2 to 3 years duration, acting as nurse crop

### RYE GRASSES (Lolium)

**RYE GRASS**—English Perennial (Lolium perenne). Splendid nurse grass

**RYE GRASS**—Domestic. Composed of English and Italian species,

### FESCUES (Festucas)

**ALTA FESCUE**. Dense and deep rooting reaching 5 to 6 ft. depths, excellent for soil erosion and live stock like it

**CHEWING'S NEW ZEALAND** (Festuca Rubra Fallax). Grows well on barren uplands or dry light soils; resists heat and drought. Recommended for lawns and putting greens, in shade or sun; makes a close sod by spreading underground rootstocks; stands close cutting.

**PENN LAWN CREEP RED FESCUE**—Latest improvement in grasses bred for drought tolerance, disease resistance.

**ILLAHEE FESCUE**. An improved strain of Creeping Red Fescue, more spreading, dwarfer and darker, green;

**CREEPING RED FESCUE** One of the best fescues obtainable, it spreads from the roots, making a dense turf which tends to crowd out weeds. Does well in shade and is good on sandy soil.

**MEADOW FESCUE** (Elatior pratensis). Fast growing, highly nutritive, broad leaved, tall grass, for permanent pastures

### POA GRASSES

**CANADA BLUE GRASS** (Compressa). Spreads by creeping underground rootstocks. Recommended over Kentucky Blue for lawns where the soils are poor, clayey or hard.

**KENTUCKY BLUE** (Pratensis). Has spreading underground rootstocks. Providing soils are rich, moist, alkaline, clayey, it produces our best lawns, improving each year; at its best after 2 or 3 years. Water at approach of dry seasons, not tolerant of droughts; avoid mowing during this period.

**ROUGH STALK MEADOW GRASS** (Trivialis). For shaded lawns it is our No. 1 grass. Otherwise identical with Kentucky Blue in characteristics and requirements.

**WHITE CLOVER** (Trifolium repens). Sown sparingly over lawns it makes dwarf growth, imparts a fine, sweet fragrance and will grow where no grass will.

### WILD WHITE CLOVER (N. Zealand)

Most vigorous growth; a small leaved prostrate sort that thrives on the poorest of soils.

## Why the Mystery?

## THERE ARE NO SECRETS Here..

### BUILD LAWNS IN POOR SOILS WITH BURNETT-SEEDSMEN'S "POORSOIL LAWNMIX"

Drouth Resistant grasses is the answer to establishing a lawn in poor, sandy soils, for the same reason that camels, not horses, are used in the desert. - - So, Burnett-Seedsman have selected the best drouth grass, namely, **Creeping Red Fescue** (Illahee strain). Because of its tolerance of drouth, Illahee is especially adapted to dry, sandy or gravelly soils—poor or rich. Illahee Creeping Red Fescue produces a deep rooted sod that withstands tramping and abuse. It spreads out, carpet-like, by means of underground rootstocks and overground stems. The grass blades are rich green, fine, smooth and soft; they stay green when other grasses are rich green and sear in Summer. Illahee is disease resistant; stands close cutting; grows in sun or shade and reaches full maturity in two years. It grows well with **Highland Bent**, also included in **Burnett-Seedsman's Poorsoil Lawnmix**. **Highland Bent's** growth habit somewhat parallels Illahee Fescue, especially being able to withstand adverse conditions of climate and low soil fertility. To these two permanent grasses is added a small percentage of domestic Rye Grass which acts as a nurse crop. **Burnett-Seedsman's "Poorsoil Lawnmix"** contains 75% Illahee Fescue, 10% Highland Bent and 15% domestic Rye grass, by weight.

### BURNETT-SEEDSMEN'S "FORMULA NO. 1" is a NO. ONE

Lawn Grass Seed Mixture, because it is made up of 40% Illahee Fescue—30% Merion Blue—15% Red Top—15% Rye Grass. Burnett-Seedsman's "Formula No. 1" is a balanced mixture.

Burnett-Seedsman's "Formula No. 1" will grow in sun or shade. 1 lb., \$1.50; 5 lbs., \$7.25; 10 lbs., \$14.00; 25 lbs., \$34.50; 100 lbs., \$135.00.

### Shady Place Lawn Grass Seed Mixture

Certain grasses, like certain flowers, revel and flourish in the shade. By including sufficient quantities of the shade loving grasses along with commodious amounts of the choicest dwarf and creeping grasses, you may be assured of a successful lawn in the shade. Remember, in shaded situation where the sun's rays do not permeate sufficiently to dry the ground, a damp and acid condition exists. It is well to add lime before sowing.

# what you should know about **MERION** Kentucky Bluegrass

Forming a beautiful, tight, wear-resistant sod, Merion is noted for its broader blade and its darker green color.

This carefully selected new grass remains green during heat and drought

when other bluegrasses go dormant or die out.

It will also go dormant in our hottest weather, but it will stay green longer and recover sooner.

On the other hand, some of the common bluegrasses fail to recover during our worst drought seasons. Part of the hot-weather lag is due more to rust and leafspot than to the actual temperature itself. These plagues can knock out common bluegrass completely. Yet Merion recovers when its needs are being met, and often damage is so slight that the homeowner hardly realizes it has been infected.

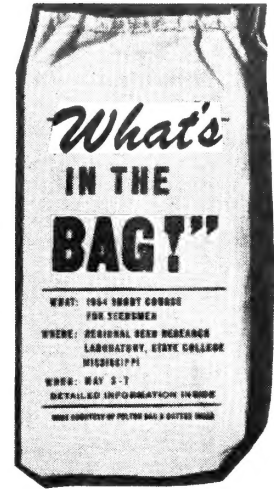

## NEW LOW PRICES MERION BLUE

### DOES A BETTER JOB!

- Needs Less Water
- Crowds Out Weeds
- Withstands Closer Mowing

In latitudes where Merion goes dormant during the crabgrass heat, it is very practical to have a hot-weather lawn of zoysia or bermuda grass overseeded with Merion to give color during spring, fall and winter.

# use the best!

### CLOVERS

**ALSIKE.** Adapted to a variety of soils, even too wet and too acid; produces more hay, stands longer, grows quicker than other clovers.

**BIRDSFOOT TREFOIL.** Long lived clover, deep rooting and drought resistant.

**CRIMSON CLOVER.** Best used for hay or cover crop for turning under.

**LADINO WHITE CLOVER.** A giant white sort, highly recommended for permanent pastures, especially adapted to moist soils; heavy producer throughout entire pasture season.

**MAMMOTH RED.** Superior grade of red clover, larger and later maturing, fine for grazing and hay.

**SWEET CLOVER.** Withstands adverse soil conditions, is hardy and used for hay, pasture or turning under, especially on poor soils.

**ORCHARD GRASS** (Dactylis Glomerata). Does well in orchards 'neath trees, makes early, rapid growth; for hay, cut near blossoming time; deep rooting, stands drought well.

**TIMOTHY** (Phleum Pratense). Our principal hay grass, rich nutritive stock. Does best in cool and moist soils.

## TO SOW

### 1 AGERATUM

Universally popular blue flower for beds and edging; also greenhouse Winter flowering. Thrives in any soil, in sun or partial shade, Spring to frost blooming.

**Blue Ball W. F. Improved Strain.** Uniform, even, compact, 4 in. plants, of richest shade of blue; long blooming.

Pkts. 15c and 25c; 1/16 oz. \$1.00

**Fairy Pink.** Soft salmon-rose pink; lovely. Pkt. 25c

**Midget Blue (S.M., A.A.S., 1940).** Compact, azure blue, 3 in. Pkt. 25c; Large Pkt. 50c; 1/16 oz. \$1.50

#### New Tetra Ageratum

**BLUE MINK** 10 in. A true "tetra" with unusually large flowers, borne on stiff stems that hold them well above the foliage. Grown from seed, the plants are uniform and compact, comparing favorably with the varieties Riverside and Cardinal Mundelein which are propagated from cuttings.

While the stems rise well above the foliage, they are not conspicuous, still are long enough to permit cutting for use in low bowls and flower arrangements. Pkt., 35c 1/16 oz. \$1.50

### 2 ALYSSUM (*Madwort*) a-p

A dainty flower for edging beds, carpeting borders or rockeries. Uniform, fragrant; continuous bloomer in any soil. Withstands drought.

**Carpet of Snow.** "Select Strain" a. White, spreading, 3 in. Pkt. 15c; 1/4 oz. 50c

**Little Gem va.** White, erect and compact, 5 in. Pkt. 10c; 1/4 oz. 50c

**Royal Carpet.** 1953 All-America Silver Medal. Rich violet flowers in large heads completely cover the compact plants . . . grows 10 in. wide and about 3 in. high. Makes a distinctly lovely edging from early summer to frost. Pkt. 25c;

**Saxatile Compactum p.** Golden yellow, 12 in. Pkts. 15c and 25c; 1/4 oz. 75c

**Violet Queen (New 1941).** A very rich deep shade of violet. Sweetly scented. Dwarf, compact, neat plants are free flowering. Pkts. 15c and 25c; 1/4 oz. \$1.00

### 4 ACROCLINIUM (*Everlasting*) a

Charming in the mixed border as well as dried for Winter bouquets. Cut when in bud, 14 in. to 20 in. They flower within a few weeks after sowing.

**Large Flowered Double Hybrids (New).** Twice the size of ordinary strains, beautiful pastels of salmons, pinks, apricots, cerises and whites, enhanced by contrasting dark centers. . . . Pkt. 25c; 1/4 oz. \$1.00

### 6 AQUILEGIA (*Columbine*) p

● **COLUMBINE McKana's Giants** Trials showed it superior to other hybrid columbines, with larger flowers, longer spurs and much richer and more beautiful colors than comparison strains.

Huge blooms 3 to 4 1/2 in. across, in a gay mixture of clear colors. Pkt. 50c

### ARCTOTIS (*African Daisy*) a

Fine cutflower, 36 in.

**Grandis.** Showy, 2 in., blue-eyed white daisy with lilac reverse; blooms Summer to frost. . . . Pkts. 10c and 20c; 1/4 oz. 50c

**Hybrids.** Charming new shades of orange and red, 2 1/2 in. to 3 inch across, 12 inch high, fine for borders. . . Pkt. 25c

**Indoors:** Use a well drained soil composed of 1 part sand, 1 leaf mold, 1 garden loam. **Mix Formicide** with soil to prevent damping off (lb. 75c). **Sow seeds** in flats or pots, cover lightly (don't cover fine seeds like petunia), water with fine mist sprayer; cover with glass and shade. **When sprouted** bring to light and when a few inches high transplant into **Garden Flats** or cold frame; after danger of frost is past, transplant outdoors.

#### ABBREVIATIONS USED

a—**annual.** Of one season's duration from seed to maturity and death. Sow seed indoors or in hot-bed and transplant later or sow directly outdoors after danger of frost is past. They bloom the first year from seed.

p—**perennial.** Of three or more seasons' duration. Sow seed through June until August, and transplant; plants live through the Winter and flower for a number of years. Protection should be used on the half hardy types during the Winter.

### 3 BELL OF IRELAND (*Malucella Laevis*)

is an interesting novelty item. Plants grow about two feet tall and have long graceful stems for cutting. Both foliage and flowers are the same attractive light green color. Flowers practically cover the stem, are delicately veined and have a small white center. For a table arrangement it is completely different and unusually attractive. Bells of Ireland is also a good hot weather flower. — Pkt. 25c

### CAMPANULA 5

#### (*Canterbury Bells*) b

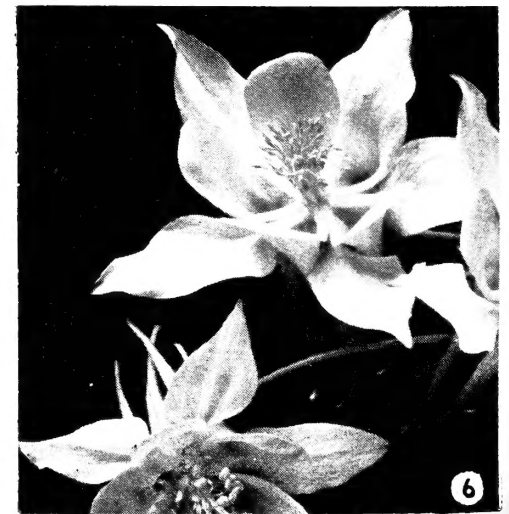

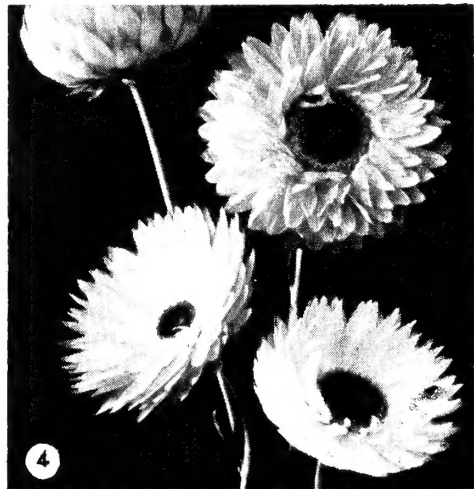

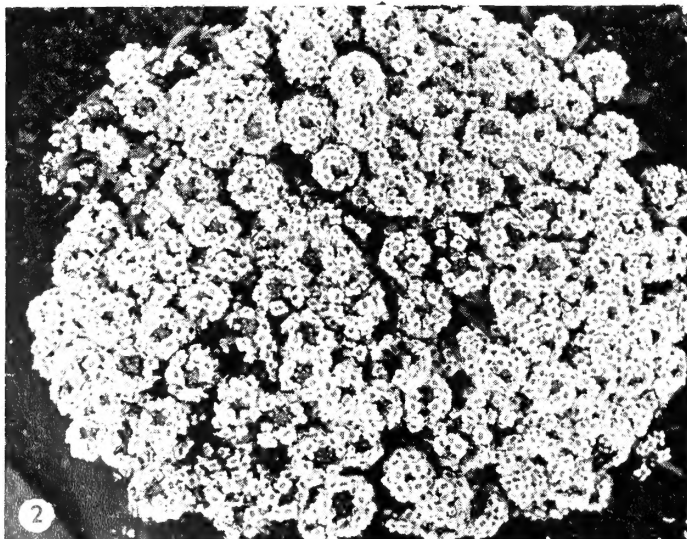

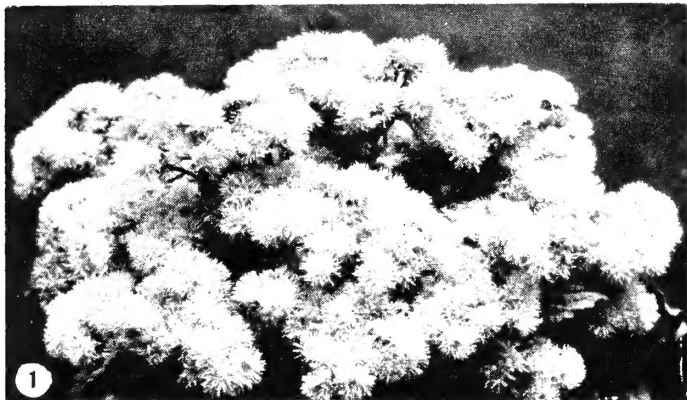

Pyramids of lovely pendant bells, borne in profusion, June to August, fine cutflower, 30 in., rich, light, well drained soil. Give slight Winter protection.

*Asters a (Wilt Resistant)*

Need no introduction, but what is **Wilt Resistant Aster Seed**? It's a strain of seed produced from plants that were grown in heavily wilt-infested soil. It is reasonable to infer that if a strain was able to grow to full maturity and bear seed, it's genera or offspring must likewise be immune to wilt. Don't take chances, sow **Wilt Resistant Strain Asters** wherever possible.

**SUPER GIANT WILT RESISTANT.** Spectacular in the garden and valuable as a cut-flower because of its long, wiry, non-branching stem and huge ostrich feather flowers. Blooms late summer to frost, 3 ft.

## Stressing Quality Seed

### All-America Vegetables

1958

### HYBRID CABBAGE

**O-S CROSS.** 70 Days. Honorable Mention All America trials 1951. This first F<sub>1</sub> hybrid cabbage to be introduced was bred by a method requiring no hand pollination. Its chief merits are huge size, high quality and extreme vigor. The heads weigh up to 10 pounds, are solid, low growing, short stemmed, with bluish outer leaves and a light green interior. Pkt., 35c

**Hybrid Sweet Corn Honey.** 76 days. This hybrid was bred for Roadside Stand and home garden ears 7x1 1/2. 12 row very tender unexcelled flavor.

### CUCUMBER

**Hybrid Early Surecrop.** (B.M., A.A.S. 1951) (58 Days) High yielding, good keeping, disease resistant White Spine type cuke; 8 to 9" long, 2 1/2" thick, dark green; tender, crisp and of good flavor. Pkt. 25c

### EGG PLANT

**Vaughan Hybrid.** An F<sub>1</sub> hybrid with excellent vigor. The fruit are very large and dark. Pkt., 35c.

### HYBRID ONIONS

**Abundance.** Early Yellow Globe Hybrid for limited storage. Bulbs are uniform large high globe. Bright attractive shell, medium dark yellow, high yielding adapted areas where Early Yellow Globe is grown.

**Magnifico.** 105 days. A sweet Spanish hybrid that will mature larger bulbs than the regular Spanish. 10 days earlier.

### Hybrid Pepper

**All Big** (Illinois F-5). 65 days. Early maturing general purpose variety for market and home garden. Fruits pendant dark green 3 and 4 lobes, walls medium thick. Pkt. 35c 1/2 oz. 75c; oz. \$1.25

### Hybrid "Seedless" Water Melon

**Extra Sweet and Delicious.** This 6 lb. watermelon produces undeveloped seeds as in cucumbers and may be eaten without affecting it's fine flavor. Pkt. 10 seeds 75c

### Red Skinned F<sub>1</sub> Hybrid Tomato

Medium early, large (1/2 lb. or over) rounded fruit. Very meaty with less seeds. Pkt. 50c

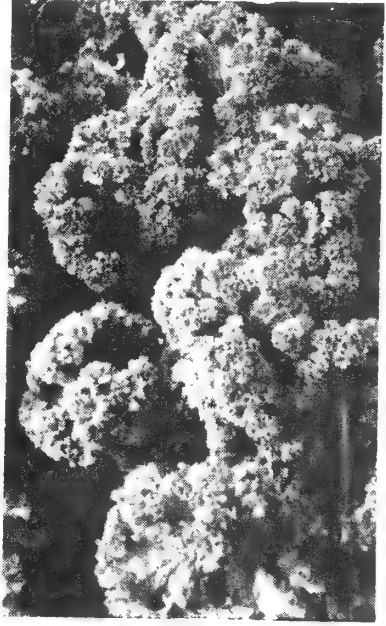

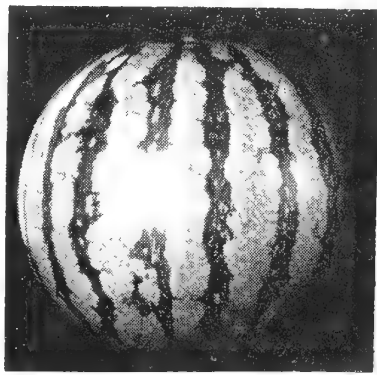

**HYBRID SPINACH #7.** 42 days. Plant upright and semi-compact in habit. Foliage dark green, medium savoyed, resistant to Blue mold and mosaic. Especially adapted for early Spring or Fall. Pkt., 25c; Oz., 50c; 1/4 lb. \$1.50.

### Burpee Hybrid MUSKMELON

82 days. (Orange Flesh) Burpee Hybrid Cantaloupe is a true, first generation (F<sub>1</sub>), outstanding for quality and flavor. Fruits are heavily netted, ribbed, round to slightly oval, 7 in. long, 6 in. across and weigh 4 to 4 1/2 lbs. each. Customers, in some sections of the country, have written us that they have grown much larger fruits of the Burpee Hybrid cantaloupe. The sizes we give are average; we, too, have grown much bigger melons. Regardless of their size, quality is unsurpassed. Flesh is deep orange, thick, firm, juicy, sweet and of the most delicious flavor of any cantaloupe.

Vines are vigorous growing and produce good early yields of large fruited, highest quality melons.

Pkt. (40 seeds) 75c; 2 pkts. \$1.40;  
 3 pkts. \$1.95; 1/4 oz. \$2.50

**GREEN WAVE.** All America Award for 1956. This gives the longest harvest in hot weather and has the darkest green coloring of any mustard. Holds quality two weeks longer than Giant Southern Curled Longstanding. Pkt., 20c; Oz., 60c

**PARADISE** (New '41)  
Here is an asparagus that actually  
comes into bearing **ONE YEAR**  
**EARLIER** than any other variety.  
An exceptionally strong, vigorous  
producer. Some say it produces  
twice the crop of ordinary aspara-  
gus. The stalks are like Martha  
Washington in appearance, large  
and green. Just imagine, only 6 to  
8 stalks needed to make a pound.  
Its flavor is unusually mild and  
liked by all. Paradise is, rust-  
resistant.  
Roots: 1 yr. old—100, \$5.00.  
2 yr. old—100, \$6.00.  
Seed: Pkt. 25c; oz. \$1.00; ¼ lb.

**Broccoli**

**Easier to grow than Cauliflower.**  
No other table green has captured the  
appetites of a Nation more than Broccoli,  
and why not? Its delicious fine flavor  
is appetizingly pleasing even to children,  
yet rich in iron; more easily digested  
and is of easier culture. Set plants 18  
in. apart in rows and 24 in. between;  
when the center flowers form, cut with  
about 7 in. of stem; this will be followed  
later by several smaller heads. No fuss  
in tying up, like in cauliflower.

**Fifty Day Sprouting Calabrese**

Just think of it—you can pick "Fifty  
Day Sprouting Broccoli" in 40 to 50 days  
after transplanting, in certain localities;  
50 to 60 in others. Seeds of this super-  
lative variety were imported direct  
from the grower in Italy.

**● ZOYSIA SEED**

The Most Talked of Grass

**Cabbage**

Cabbage thrives in rich, well-drained,  
loamy soil. For early crops, sow seeds  
in hot-beds in February-March; transfer  
to cold frames to harden, then trans-  
plant 18 in. apart in rows 30 in. apart.

**Copenhagen Market.** Early, round headed  
cabbage, compact and with few outer  
leaves; solid and of medium size.

**Danish Ball Head.** Short-stemmed late  
ball shaped, solid compact and good  
keeper.....Pkt. 15c; ½ oz. 50c; oz. 90c

**Early Jersey Wakefield.** Earliest conical  
headed sort; perhaps the most popular  
early; matures same time as Copenhagen  
Market....Pkt. 15c; ½ oz. 50c; oz. 90c

**Mammoth Rock Red.** Large, round, in-  
tense red heads; strong grower and of  
late maturity, good keeper.  
Pkt. 15c; oz. \$1.00

**Savoy Chieftain** (A.M., A.A.S., '38). An  
earlier Savoy, compact, flat, medium sized  
heads; broad, dark olive green rounded  
leaves; short stems. Has a much higher  
percentage of well formed heads.

Late Dutch type; heads are large, round  
and flattened, very hard and fine grained;  
good keeper. Pkt. 15c; ½ oz. 50c; oz. 90c

**Carrots**

One ounce of seed sows 100 ft. row.  
Cultivation similar to beets. Freshly  
manured soil often causes divided roots,  
advisable to fertilize with potash in pre-  
vious Fall. Sow seed from early Spring  
until mid-June, ½ in. deep in well pre-  
pared soil and thin out to 3 in. apart;  
rows 16 in. apart.

**Improved Long Chantenay** (70 days).  
Stump rooted, early and productive, of  
deep orange color. Fine for garden use  
and bunching.

**RED HEART.** (Red Core Chantenay). 70 Days.  
It has no visible core, but its rich red coloring is  
even throughout the flesh. The top is very strong,  
hence ideal for bunching. The root is of medium  
length, blunt smooth and easily prepared for serving.

**Danvers Half Long Select** (75 days).  
Most popular half long sort. Roots  
bright, deep orange, 6 in. to 7 in. long  
and uniformly tapered to blunt end.  
Very productive, good shipper & keeper.

**Imperator** (A.M., A.A.S., '33) (77 days).  
A long variety with uniform tapering to  
semi-blunt end, with a smooth deep  
orange skin and flesh, almost coreless.  
Has set the fashion in slim carrots.

**Nantes Improved** (72 days). Excellent  
forcing and garden variety with small  
core; roots 6 in. long, bright orange,  
cylindrical and blunt ended, flesh deep.

**SWEETHEART.** 70 Days. A very  
fine strain of Nantes type. The top is short and the  
root is a bright orange with the least core of any variety  
grown.

**IMPERIDA.** 77 Days. A very long slender root  
with a short strong top. The roots are a deep orange  
and from 7 to 8" long.

**Prices on all CARROTS**

**New York Spineless.** The better known of the two. Plants spreading, spineless, bearing 4 to 8 fruits; broad, oval, glossy black-purple; larger than Black Beauty.

Pkt. 20c; oz. \$1.25

**BEAUTY HYBRID.** Pkt., 35c See page 23

**ENDIVE**

One ounce sows 100 ft. of drill. Endive must be grown quickly to avoid bitterness and toughness; feed manure and water abundantly. Sow seed April 15th for early use; for June and July main crop in rows 15 in. apart and thin to 12 in. apart.

**Batavian Full Heart** (A.M., A.A.S., '34) (Escarolle). Improved form of Broad Leaved Bavarian which is considered more of a Winter salad. Medium sized plant with deep full, compact and well blanched heart of infolded broad leaves, thick and buttery in texture and of splendid quality. Few Americans know that it is an especially well flavored vegetable when boiled.

Pkt. 15c; oz. 40c; 1/4 lb. \$1.25

**KALE (Borecole)**

Hardier than cabbage, this vegetable makes splendid greens for Winter and early Spring use. Flavor is improved by frost. Sow from April 15th to June 1st and transplant or thin to 18 in., as for cabbage.

**Dwarf Green Curled Scotch.** Wide spreading plants, finely curled and of a deep green color. Quite handsome and ornamental.....Pkt. 15c; oz. 60c

★PHLOX — Twinkle Mixed  
ALL-AMERICA SELECTIONS 1957

Dwarf star annual phlox, Twinkle, in choice mixed colors, makes a delightful bedding and edging subject. Growing only six inches high, yet having flowers and heads as large as the old 12 to 18 inch tall type, Twinkle covers itself with a twinkling mass of star-shaped flowers. Flower colors are well balanced and include a high percentage of salmon, rose and pink shades. In fact, the trials showed a much wider and more attractive color array than the writer has noticed in any other star phlox. Pkts. 35c 3 pkts. \$1.00
